SPECIAL RELEASE

Q1 2019 Poultry and Egg Production and Inventory in ARMM

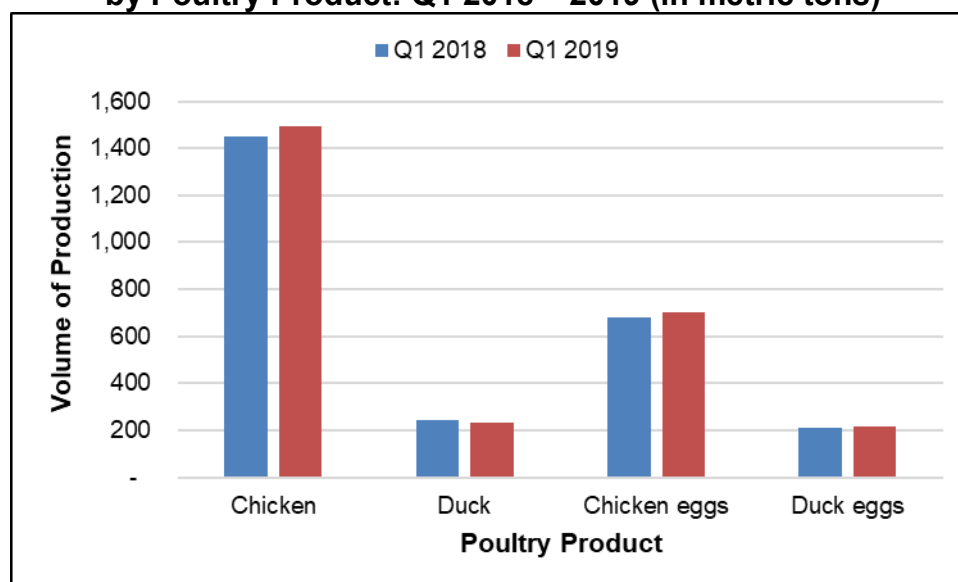

Date of Release: **26 June 2019**

Reference No. **2019-030**

Poultry and egg production in ARMM increased by 2.13 percent in Q1 2019

The total production of poultry and eggs in ARMM increased by 2.13 percent in the first quarter of 2019, that is from 2,584 metric tons (MT) to 2,639 MT in the first quarter of the previous year. Production of all poultry products, except Duck, also increased. This includes Chicken, Chicken Eggs, and Duck Eggs with corresponding growth rates of 2.97 percent, 2.93 percent and 2.87 percent. On the other hand, production of Duck decreased by 5.74 percent.

Chicken inventory in ARMM increased by 9.01 percent

Chicken inventory, specifically for Native/Improved, increased by 9.01 percent, from 1,728,191 birds in the first quarter of 2018 to 1,883,901 birds in the same period of 2019. Inventory in all provinces of ARMM, except Tawi-Tawi, also increased. Basilan, Lanao del Sur, Maguindanao and Sulu posted positive growth rates of 10.17 percent, 12.45 percent, 28.68 percent and 2.65 percent, respectively. On the other hand, Tawi-Tawi decreased by 1.39 percent. There is no Broiler and Layer Chicken recorded in ARMM during this period.

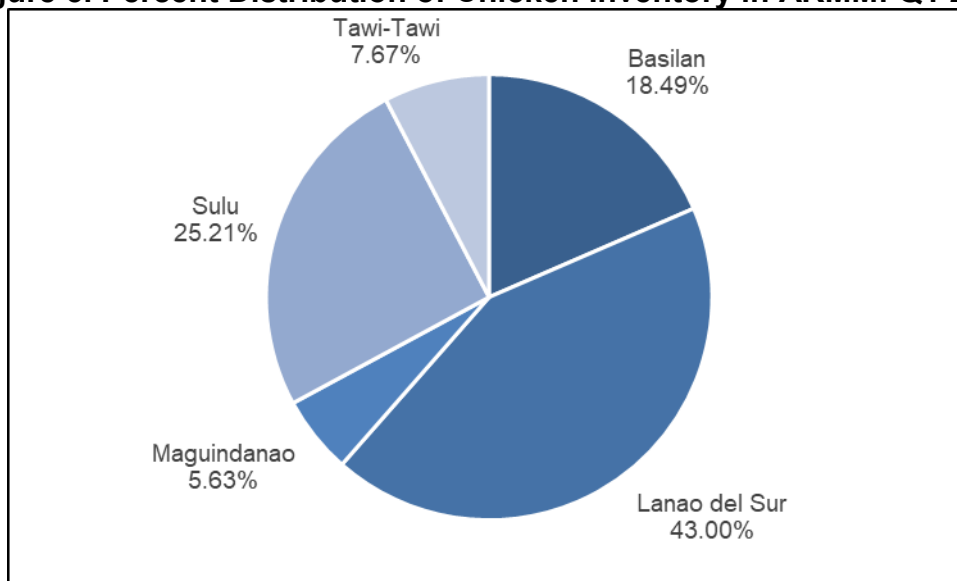

About 43.00 percent of the total Chicken inventory in ARMM during this period was in Lanao del Sur; while the 25.21 percent was in Sulu. The remaining 18.49 percent, 7.67 percent and 5.63 percent were in Basilan, Tawi-Tawi and Maguindanao, respectively.

TECHNICAL NOTES

This report presents the production performance of the poultry and egg industry of the region in terms of volume of production in 2018.

This describes the situation of poultry and egg industry in ARMM by providing comparative analyses of data on production between 2017 and 2018, among regions across Mindanao and among poultry products.

The data for this report were collected by the Philippine Statistics Authority (PSA) through the two (2) major surveys, namely:

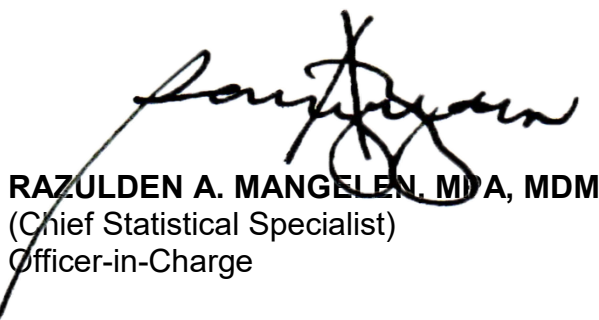

- 1) The Backyard Livestock and Poultry Survey (BLPS) which covers one (1) of the four (4) replicate samples of the Palay and Corn Production Survey (PCPS). It consists of 15,069 sample households in 1,051 sample barangays nationwide; and,
- 2) The Commercial Livestock and Poultry Survey (CLPS) which covers 154 independent farms as of July 2017. A carabao farm is considered commercial when it has a capacity of at least 21 heads of adult carabaos.

Both surveys are conducted semi-annually (January and July) simultaneously in all provinces.

Another survey that supplements the statistical requirements of the livestock and poultry subsectors is the Survey of Slaughterhouses and Poultry Dressing Plants (SSHPDP). This covers around 1,387 Accredited (AAA and AA) and Locally Registered Meat Establishments (LRMEs) nationwide and is undertaken in coordination with the National Meat Inspection Service (NMIS).

Concept/s and Definition/s

Volume of Production - the volume of locally-raised animals disposed for slaughter which include animals shipped-out for slaughter. This is expressed in thousand metric tons, liveweight.
