TECHNICAL NOTES:

Live Birth is a complete expulsion or extraction from its mother of a product of conception, irrespective of the duration of the pregnancy, which after such separation, breathes or shows any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached; each product of such a birth is considered liveborn.

Marriage is a contract of permanent union between a man and a woman entered into in accordance with law for the establishment of conjugal and family life.

Death refers to the permanent disappearance of all evidence of life at any time after live birth has taken place (postnatal cessation of vital function without capability of resuscitation).

Fetal Death refers to death prior to the complete expulsion or extraction of a product of conception from its mother, irrespective of the duration of pregnancy; the death is indicated by the fact that after such separation, the fetus does not breathe or show any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, and definite movement of voluntary muscles.

Early Neonatal Death refers to death among live births during the first 7 days of life.

Neonatal Mortality refers to deaths among live births during the first 28 completed days of life.

Infant Mortality refers to deaths of infants under one year of age.

Perinatal Mortality refers to the deaths of fetuses, weighing at least 500 grams or had 22 completed weeks of gestation, and of infants 7 days of age.

Maternal Mortality refers to the death of a woman while pregnant or within 42 days of termination of pregnancy, irrespective of the duration and the site of the pregnancy, from any cause related to or aggravated by the pregnancy or its management, but not from accidental or incidental causes.
